

The Association of Procurement Technical Assistance Centers (APTAC) is a membership organization comprised of and supporting Procurement Technical Assistance Centers (PTACs) and the professionals who work for them. APTAC's mission is to support the PTACs in their efforts to provide the very highest levels of government contracting assistance, thereby increasing and improving the supplier base which serves our armed forces and our government as a whole.

APTAC's primary function is to provide a national forum to conduct training and facilitate the exchange of information and ideas among procurement professionals, to provide a national voice for the PTACs, and to otherwise work toward strengthening the program and the level of services it provides.
